**Start image: preferred group = 2**

Apply max-chunk and data-airtime limits

**Plan missing chunks; start group timer**

Urgent traffic may limit / shorten a group

**Transmit the selected data group**

**Query receiver bitmap**

**Matching reply before deadline?**

No

**Timeout count**

1: retry query
2: smaller future size
4: pause / manifest

1-3

Yes

**Save bitmap; measure confirmed bytes / time**

Stale replies rejected; duplicate bytes not counted

**Evaluate preferred size or trial**

Accept a trial only above +5% measured rate.
Probe again after 3 preferred-size samples.

More chunks

All chunks + COMPLETE

**Save delivery; expose result to UI**
